Course Copy

The Course Copy feature allows instructors to copy content from courses they are currently teaching or have taught in previous semesters, into courses that they will be teaching. This is especially useful if an instructor teaches the same course from semester to semester. Please see the notes and chart at the end of this tutorial for more detail on how different parts of the course will be copied.

Note: To use Course Copy, the user must be listed as ‘instructor’ or ‘TA’ in both courses. Also, the course to be copied into must be an existing course. For example, if an instructor wants to copy an existing fall course to a spring course, the course shell for the spring course must already be available (from ISIS) to perform the course copy.

Using Course Copy:

1. Login in the course you wish to copy content from.

2. Once inside your course, navigate to the Control Panel (lower left side of the screen) and choose ‘Packages and Utilities’ then ‘Course Copy.’

3. For Copy Type, select ‘Copy Course Materials into an Existing Course.’

1. Select Copy Type
4. Click ‘Browse’ to locate the destination course.

5. After clicking Browse, scroll through the list of courses (or use the Search feature) to find the destination course. In this example, we’ll choose ‘CER_Training_Copied.’ Click Submit.

6. Once the destination course has been identified, select the areas of the course to be copied:
2. **Select Copy Options**

- **Destination Course ID**: CER_Training_Copied
- **Browse...**

**Select Course Materials**

- **Select All**
- **Unselect All**

- **Content Areas**
  - Home Page
  - Syllabus
  - Course Content
  - Student Assessment

- **Adaptive Release Rules for Content**

  *User criteria will not be captured if enrollments are not included. Assignment submissions will not be captured if the Grade Center columns and settings are not included.*

- **Announcements**
- **Blogs**
- **Calendar**
- **Collaboration Sessions**
- **Contacts**
- **Content Alignments**
- **Discussion Board**
  - Include starter posts for each thread in each forum (anonymized)
  - Include only the forums, with no starter posts
- **Glossary**
- **Grade Center Columns and Settings**
- **Group Settings**
- **Journals**
- **Retention Center Rules**
- **Rubrics**

- **Settings**
  - **Availability**
  - Banner Image
  - Course Guest Access
  - Course Observer Access
  - Duration
  - Enrollment Options
  - Language Pack
  - Navigation Settings

- **Tasks**
- **Tests, Surveys, and Pools**
- **Wiks**

---

**Note**: If you have tests or assignments in your course, you must select this option if you want them to be deployed in your destination course.

**Note**: Selecting ‘Availability’ may cause your destination course to be available to students sooner than you are ready, depending on the setting in your source course.

**Note**: If you have entered duration dates in your source course, this may cause your destination course to be hidden from students.
7. In the File Attachments section, it is recommended to select ‘Copy links and copies of the content.’

8. Leave the ‘Include Enrollments in the Copy’ option unchecked. Click Submit.

9. You should see a message that the request has been queued and that you will receive an email when the process is complete.

10. When the process has completed, click on the destination course to make sure all of the requested content has been successfully copied and begin cleanup as necessary.

Please Note:
- Some cleanup of the new site will probably be necessary. For example, the destination course contains a standard template menu that will be merged with your course menu when the course is copied over. Duplicate and/or unwanted entries may appear in the menu when the course copy is complete – feel free to delete anything that is unwanted.

- Blog, Journal, and Wiki entries are not copied over to new sites – only the titles of these items are copied.

- With the Discussion Board tool, you have the option of copying over only the forums, or the forums with all of the ‘starter posts’ of each thread, with the authors of those posts changed to ‘anonymous.’ Replies to threads are not copied.
See chart below for more detail:

<table>
<thead>
<tr>
<th>Tool/Area</th>
<th>Cleanup after copy</th>
<th>Target Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Content Area</td>
<td>Dates</td>
<td>Selecting a content area alone for copy will not copy over any tests &quot;deployed&quot; in that content area nor will it copy assignments in the content area.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>To copy over tests while keeping them deployed in a content area, all content areas in question and &quot;Tests, Surveys, and Pools&quot; and &quot;Grade Center Columns and Settings&quot; must all be selected.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>To copy over tests without keeping them deployed, just select &quot;Tests, Surveys, and Pools&quot;. All copied tests will be undeployed.</td>
</tr>
