Making a Blackboard Course Available to Students

By default, all Blackboard courses are ‘unavailable’ to students until the instructor makes them available. This allows the instructor time to build and edit the course before releasing it to students.

To make a course available:

1. Inside the course, go to the control panel in the lower left side of the screen and select ‘Customization.’

2. Select ‘Properties.’

3. Scroll down to ‘Step 3’ and set the availability to ‘Yes.’

4. Click Submit. Students will now have access to the course.
